

Fiona Dent for National Policy Forum

Elect me as your South East representative and I will be a 'listening' representative, press for policies that deal with the problems that we face in our region, our country and our world. My pledges.....

- 1) Austerity measures must be replaced by genuine investment in people, their quality of life, their education, council housing and the welfare safety net that is essential to a civilised nation.
- 2) High standards of low carbon energy production, green technology and R&D will form the strong base of our industrial policy.
- 3) High standards for clean air, clean water, sustainability, land reform and public health run through all Labour Party policies.

PTO

CV: Left school at 16, always worked full time but still managed to get a law degree at night school and bring up my son as a single parent, despite years of living in poverty.

For Labour I have worked my socks off to raise the Labour vote in otherwise Tory areas: I am the 1st Labour Councillor in Runnymede for 15 years and have visited many SE CLPs to talk about the NPF and campaigning for Labour in 'challenging' areas.

A veteran of the Jarrow NHS march. A member of UNISON, Co-Operative Party, UNITE, Artists Union of England & Howard League of Penal Reform.
